Sort by name

v1.0.0 alpha build - Kee List App - gyorgy.korek@astrazeneca.com

- Shows active lists by default.
- Alternatively, the selector can also be used to list archiv lists.
- Shows the following:
- Compeent area
- The name of the list.
- Version number
- Active/Archive

The appearance of archive lists:

List information page

The screenshot displays the 'List information page' of the Kee List App. At the top, there are two input fields: 'Name: KEE PRES 2020' and 'Field: Diabetológia'. Below these, the main content area is titled 'Kee list files <All/>' and shows a list of files with their validity dates. The status 'Version: 10' and 'Active' are displayed in green. On the right, an 'Information panel' contains a toggle for 'Show all files' (which is turned on), and three buttons: 'Home', 'Statistics (inactive)', and 'Report an error'. The bottom of the screen shows the version 'v1.0.0 alpha build' and the email 'gyorgy.korek@astrazeneca.com'.
